

Compose

Turn any article into a finished visual feature, in minutes.

Built for Nutshell Today

Small newsrooms have the stories, but no designers and no time

Hours per feature

Charts, pull quotes and layouts are rebuilt by hand for every story.

No design budget

A small publication can't hire a designer or an infographics desk.

Too many tools

Write in Docs, chart in Flourish, lay out in Canva, then paste it all back.

Great reporting, published as a wall of text.

Compose: import it, let AI structure it, edit it on the page

1

Import

Paste text, or drop in a Word doc or PDF.

2

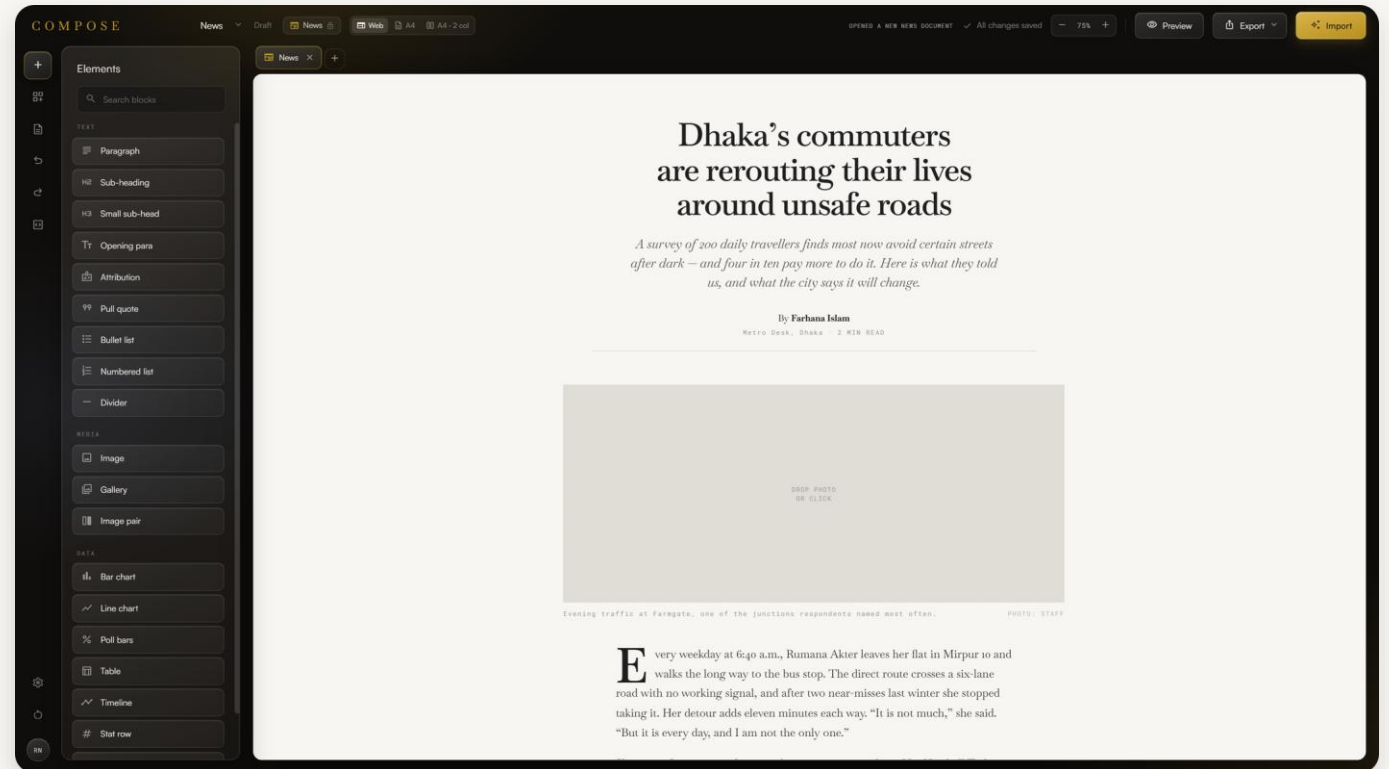

AI structures it

Headings, pull quotes, charts and tables, in your template's style.

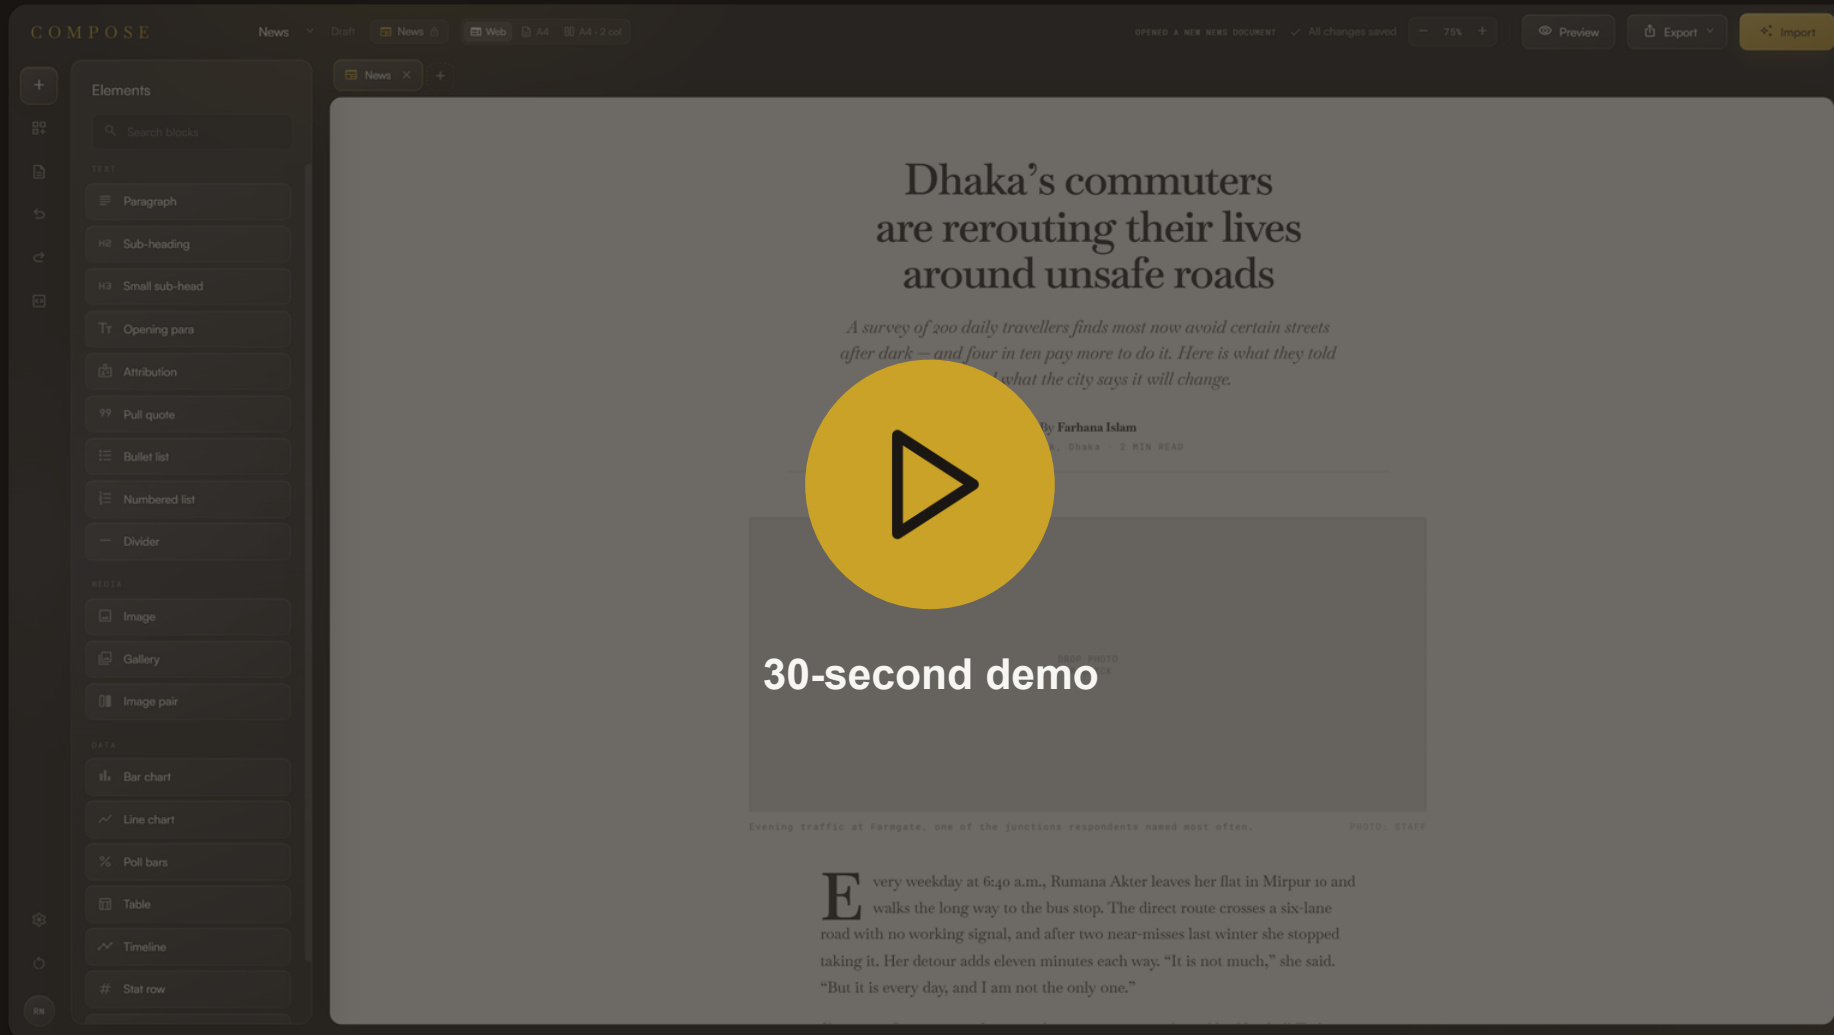

3

Edit on the page

Click any text to change it. Export when you're done.

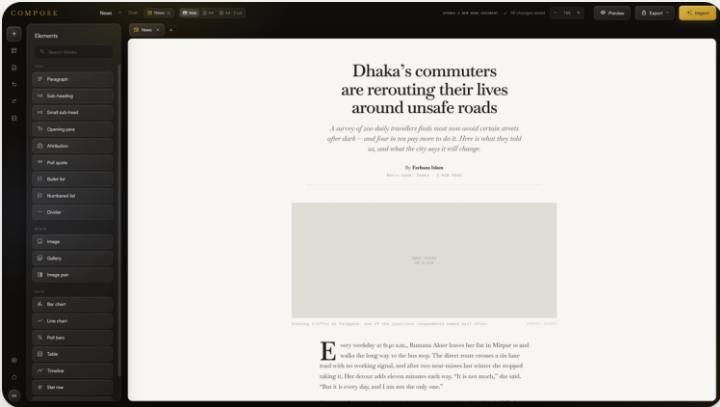

See it in action

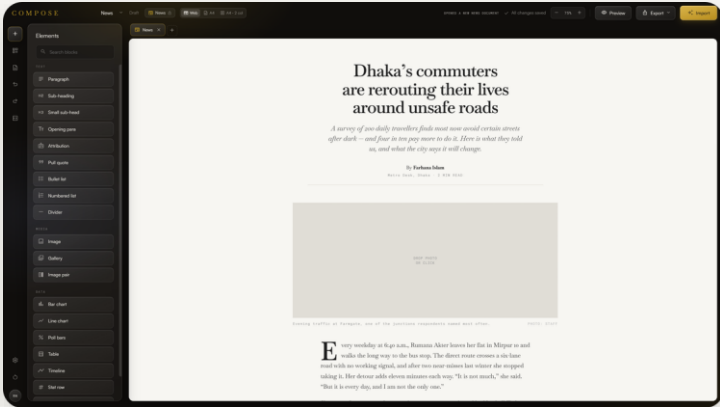

Three steps. No learning curve.

1 Drop in a file

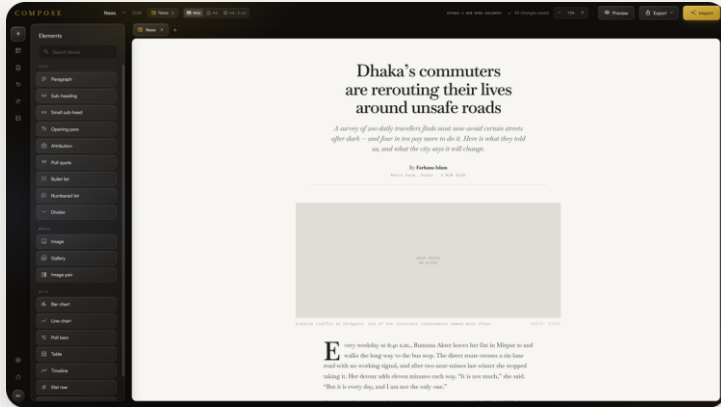

A PDF, a Word doc, or pasted text.

2 Drag in a chart

A gold line shows exactly where it will land.

3 AI fills it in

The numbers come straight from the paragraph above.

Why now: AI is finally cheap enough to disappear into the tool

Models got cheap and fast

Structuring a whole article now takes seconds and costs cents.

Newsrooms got smaller

Fewer people publish more stories, with no design desk.

Readers went visual

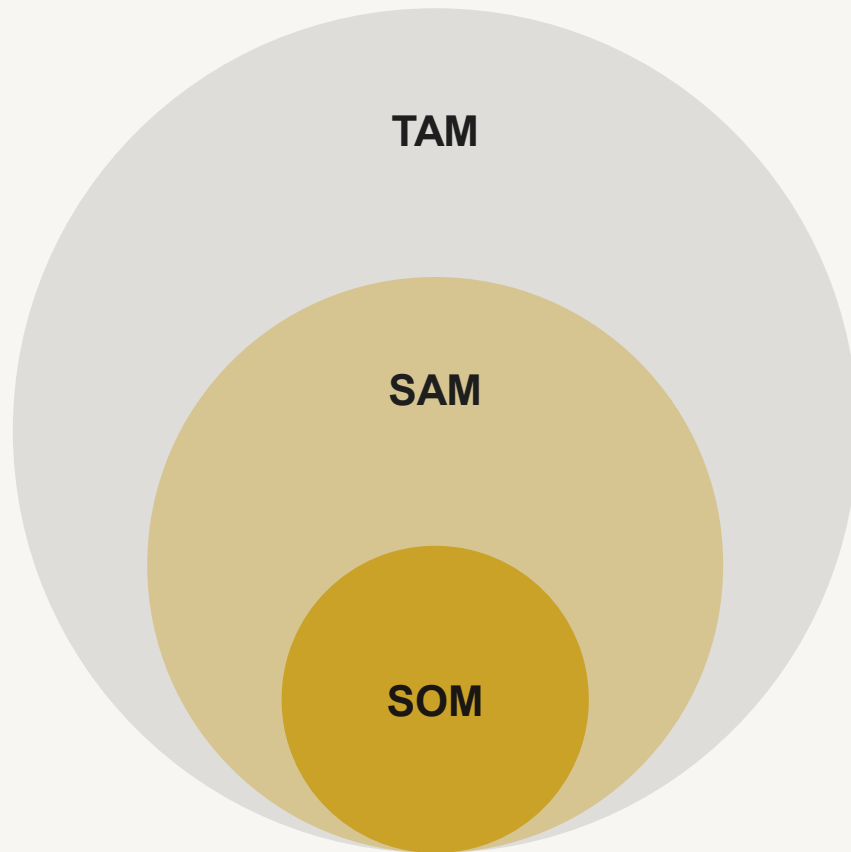

Charts, quotes and clean layouts keep readers on the page.

AI fades into the tool

No prompts to write. Drag, drop, done.

A big market, and a clear place to start

\$18.9B

TAM · Global digital content-creation market, 2024

426

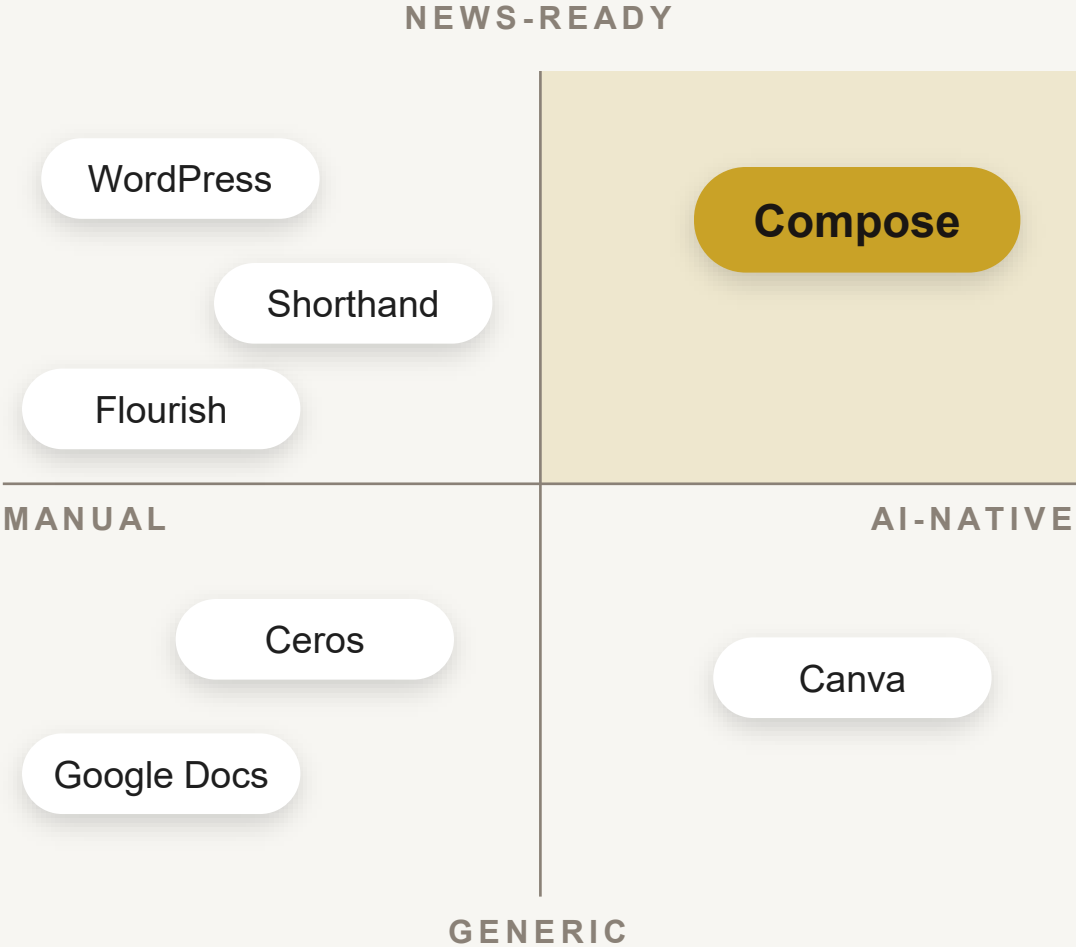

SAM · Registered news portals in Bangladesh, 2024

20

SOM · Independent publishers like Nutshell Today, our year-one goal

Sources: IMARC Group, Digital Content Creation Market report (2024); The Business Standard, April 2024, citing the Information Ministry.

Others help you design or write. Compose does both, in one editor

Story-aware AI

Charts and quotes are built from your own paragraphs.

Web and print from one file

A web page, A4 pages and LaTeX from the same document.

Any AI provider

Anthropic, OpenAI, Gemini, or a local model with Ollama.

Free to start, and almost free for us to run

Free

\$0

For writers trying it out

- All five templates
- Web layout and HTML export
- Bring your own AI key

Pro

\$8 / month

For small publications

- A4 print layouts
- LaTeX export
- Shared team workspace

Newsroom

Custom

For larger publishers

- House-style templates
- AI included, no key needed
- Priority support

Bring your own key: users pay their AI provider directly, so serving them costs us almost nothing.

What we'd build next, with your support

1

Pilot with Nutshell Today

Publish real features every week and measure the time saved.

2

One-click publishing

Send features straight to WordPress and newsletters.

3

Bangla support

Bangla templates, fonts and AI prompts for local newsrooms.

Compose. From article to feature, in minutes.

Thank you
