

Compose pitch script

Live judging · about 2 minutes · seven slides, four presenters. The script is also in each slide's speaker notes.

RUNNING ORDER

PRESENTER	SLIDES	WORDS	SPEAKING TIME
● Person 1	1, 2	59	about 24 s
● Person 2	3, 4	44	about 18 s + 30 s clip
● Person 3	5	33	about 13 s
● Person 4	6, 7	46	about 18 s

Total: 182 spoken words (about 73 s at 150 words a minute) plus the 30 s clip, about 1:43.

BEFORE YOU PRESENT

- Rehearse the handoffs. Each person ends by naming the next one.
- The deck uses the app's fonts: Baskerville, Satoshi and Roboto Mono. Install them from `pitch/fonts/` before presenting the `.pptx`, or present from `Compose-pitch.pdf`, which has them built in.
- Keep `Compose-pitch.pdf` on a USB stick as a backup.

ADDING THE DEMO CLIP (SLIDE 4)

Select the dark frame, then **Insert > Video > This Device** and pick the clip. Drag it over the frame, then on the Playback tab set **Start: Automatically**. Keep the clip to about 30 seconds.

If the video fails on the day, Person 3 can talk over slide 5 instead: it shows the same three steps.

Person 1

Slides 1–2 · about 24 s

SLIDE 1 · TITLE

16 words

Hi, we're the Compose team. Compose turns any draft into a finished, designed document in minutes.

SLIDE 2 · BETWEEN WORD AND CANVA

43 words

Word is easy to write in, but you get a wall of text. Canva looks great, but every chart and layout is made by hand. Compose sits in between: write like in Word, get a designed document like Canva. **Over to Person 2.**

Person 2

Slides 3–4 · about 18 s + 30 s clip

SLIDE 3 · HOW IT WORKS

31 words

Here's how it works. Import a Word doc or PDF, and AI structures it into headings, charts, tables and code. Then you edit it right on the page. Here it is.

SLIDE 4 · DEMO CLIP

13 words

(Clip plays, about 30 seconds) That was one document, from upload to finished layout. **Over to Person 3.**

Person 3

Slide 5 · about 13 s

SLIDE 5 · DRAG-TO-FILL

33 words

It really is three steps. Drop in a file. Drag a chart beside any paragraph. AI reads that paragraph and builds the chart from its numbers. No prompts, no settings, no design skills.

SLIDE 6 · WHAT'S INSIDE

37 words

Everything lives in one editor: five templates, from news features to LaTeX papers and lab manuals, and web, print and LaTeX output from the same file. It reads your PDFs too, and works with any AI provider.

SLIDE 7 · CLOSE

9 words

Compose: from draft to design, in minutes. **Thank you.**
